## THERE'S A REASON!

Demanding the best Lumber turned out by the biggest Mills  
equipped to make fine Lumber, and buying in such large  
quantities that we can afford to sell clean, thoroughly sound  
and seasoned Lumber for the same price that most dealers  
ask for poorly manufactured, green Lumber.

## PREFACE

We have pleasure in presenting the Fifth Volume of the Calgary City Directory.

Great care has been exercised to make it as thorough and complete as possible. A slight increase has been made in the size of the pages, and a smaller faced type has been used. These changes add considerably to the appearance and utility of the volume.

The large number of immigrants locating in Calgary has made it somewhat difficult to gather a correct and complete record of its residents, but the fact that so many are locating here is splendid proof of the City's attractiveness to the outside world.

We much appreciate the increased support accorded by the Business Community, who have not failed to recognise the many advantages accruing through the advertising columns of a Directory.

This patronage has enabled us to publish a Directory commensurate with the City's progress and demands.

In the matter of population, Calgary is making rapid increase. This, no doubt, is due to the splendid enterprise of its Citizens, to the remarkable growth of its industries, and to the spreading branches of trade and commerce. Full reference and information concerning these interesting features will be found in the Miscellaneous Section of the Directory, which is a storehouse of useful information.

## City of Calgary

Calgary, the largest and most important City on the main line of the C. P. Ry. between Winnipeg and Vancouver, situated at the confluence of the Bow and Elbow rivers, and surrounded with the best grain producing and cattle raising country in Canada, 840 miles west of Winnipeg and 645 miles east of Vancouver, is the commercial centre of Alberta, with a population of over 40,000, and the chief wholesale distributing point of the Greater West. Most of the leading Eastern manufacturers and wholesale houses are represented.

Incorporated as a town in 1882, while in 1894 it received its city charter.

Calgary is the railway centre of Alberta. The C. P. R. employ over a thousand hands in Calgary and district, its pay roll amounting to \$3,600,000 a year. The Edmonton branch and the Macleod branch of the C. P. R., respectively, run north and south from here. Both the C. N. R. and G. T. P. are now rushing operations to connect the City with their main lines and the new lines are expected to be operated by the spring of 1911.

Calgary is the divisional headquarters for the western division of the C. P. R., and has the most important shops on the line between Winnipeg and the coast, in which they employ a large number of skilled mechanics and helpers.

The principal sources from which the City has received its expansion result from the development of the rich grain producing areas and the working of the coal mines, which latter, are fully expected to equal, both in extent and quality of coal mined, any other on the continent.

East Calgary is the seat of the milling industry, but it also holds plants manufacturing Portland cement, soap and lumber, while there are located here, iron foundries, packing plants, leather works, soap and other works. In addition to these, the discovery of natural gas within the vicinity of Calgary has given impetus to the encouragement of numerous industries, and that valuable asset now supplies power to a brewing plant and for lighting purposes. Too much importance cannot be accredited to this discovery, and its value is now engaging the attention of the City Fathers.

The City's factories generally include a soap works, two candy factories, a box factory, two iron works, two breweries, two cigar factories, a meat packing plant, a breakfast food factory, cement works, three harness and a saddlery factory, two pressed brick plants, three flour mills, a coffee and spice factory, two tent and mattress factories, a bedding factory, a macaroni factory, two cold storage plants, two electric light and power plants, a gas plant, two lumber mills and several planing, sash and door factories (one of the largest planing mills on the continent), three daily, two weekly, and three monthly newspapers.

The business blocks of Calgary are of substantial construction, the more important ones being built of stone quarried from the district. The streets and business houses are lit by electricity, supplied by the Municipal Electric Light Plant, which also supplies domestic light and power.

The climate is ideal and on account of its altitude (3,389 feet above sea level), Calgary has long been favorably noted for its beneficent attributes.

The educational advantages of Calgary are of import, and its modern equipped school buildings furnish the highest educational requirements.

The public school buildings of the city are exceptionally attractive. There are also a number of private schools, including the Western Canada College, St. Hilda's Ladies' College, and the Sacred Heart (R.C.) Convent.

The City is well provided with parks, the Victoria park, comprising about 90 acres, having a good race track and various buildings used for cattle shows and exhibitions. The Island park in the Elbow River is a very picturesque spot and is greatly enjoyed by the citizens.

Calgary is the headquarters for the Territorial Live Stock Associations and the Cattle Breeders' Association hold an annual sale here of purebred stock. The Horse Breeders' Association also have an annual stallion and horse show.

Of great import to the neighborhood is the Government Creamery and Cold Storage situated a short distance east of Calgary, which demonstrates to the public the manifold advantages of mixed farming and dairying.

Further significance to this last mentioned point is lent by the C. P. R., whose irrigation policy has revolutionized Southern Alberta, and upon which \$11,000,000 has been, or is about to be expended.

Incorporated a town in the year 1882 and received its City charter in 1894.

**Fire Alarm System.**

Consists of a Gamewell 6 circuit switchboard and repeater, with 30 miles circuit, 56 alarm boxes, electric striker and 1300 lb. bell; also telephone exchange.

**How to send in an Alarm.**

Break the glass in Alarm Box, open outside door, and pull down hook all the way (once only), on inside door. Stay to direct fireman. Do not try to take key out of door, as it is locked in.

Citizens should keep in mind the location of the nearest Alarm Box to their residence or place of business.

If sending in alarm by telephone, ask Central for 68, which is used for fire purposes only. Then be sure you give the location of fire, plain and distinct, to the operator at Fire Headquarters, and do not leave phone until he has received all the information he requires.
